The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/593,175	<b>Applicant(s)</b> KHOUBEHI ET AL.	
	<b>Examiner</b> BAISAKHI ROY	<b>Art Unit</b> 3737	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "determining one or more of the values x, y, and z" in line 6. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Objections***

3. Claim 10 is objected to because of the following informalities: please restructure dependent to actively claim the method of producing the plot such as "A method of producing a plot according to claim 9, wherein the plot shows the inferred hemoglobin oxygen saturation levels in a tissue". Appropriate correction is required.
4. Claims 11-13 are objected to under 37 CFR 1.75(c) as being in improper dependent form because claims appear to be improper dependent claims and do not pass the infringement test (MPEP 608.01 (n)). Accordingly, the claims are not been further treated on the merits.

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Art Unit: 3737

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims are rejected under 35 USC 101 as being directed to non-statutory subject matter because these are method or process claims that do not transform underlying subject matter (such as an article or materials) to a different state or thing, nor are they tied to another statutory class (such as a particular machine). See Diamond v. Diehr, 450 U.S. 175, 184 (1981) (quoting Benson, 409 U.S. at 70); Parker v. Flook, 437 U.S. 584, 588 n.9 (1978) (citing Cochrane v. Deener, 94 U.S. 780, 787-88 (1876)). See also In re Comiskey, 499 F.3d 1365, 1376 (Fed. Cir. 2007) (request for rehearing *en banc* pending).

This rejection is in view of the Interim Guidelines published on November 2005, incorporated into MPEP 2106 and views presented by the PTO on subject matter eligibility of process claims to the Court of Appeals for the Federal Circuit in *In re Bilski*, Appeal No. 2007-1130. Based on Supreme Court precedent and recent Federal Circuit decisions, a § 101 process must be tied to another statutory class (such as an apparatus) and must positively recite the subject matter that is being transformed by identifying the material that is being changed to a different state.

Examiner suggests amending the method claims to identify the statutory class (the apparatus) necessary to carry out the method steps. Therefore the claims must positively recite the tangible medium or the apparatus elements within the body of the claim.
